

1. Open Game Scene

Unity 5.5.0f3 Personal - Game.unity - English Tracing Book - Tizen <DX11 on DX9 GPU>

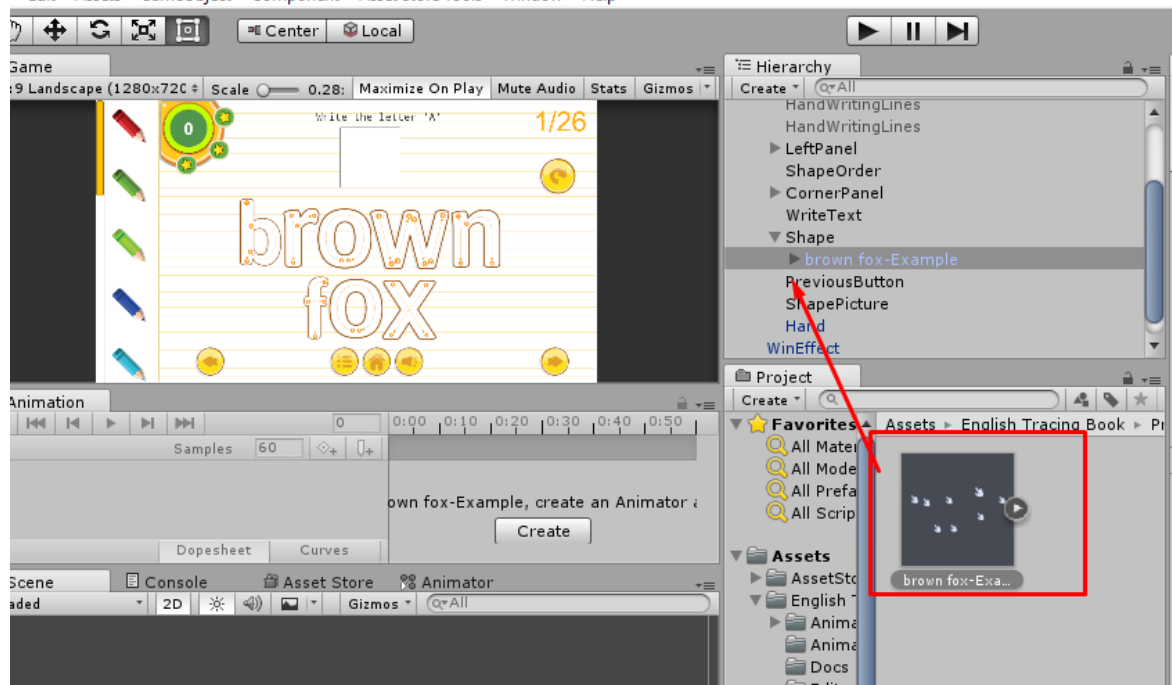

Edit Assets GameObject Component Asset Store Tools Window Help

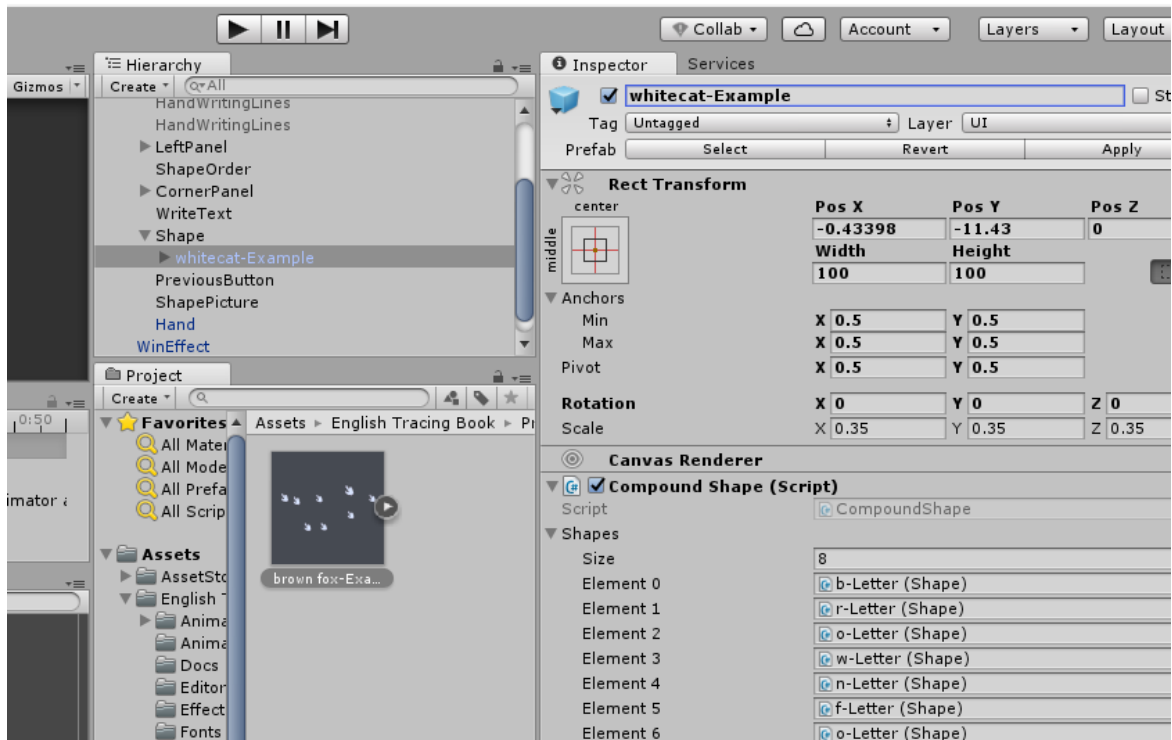

2. Drag and drop **brown fox** prefab to the Shape GameObject in the Hierarchy, or create an empty gameobject and then add new **CompoundShape** component to create a sentence

Unity 5.5.0f3 Personal - Game.unity - English Tracing Book - Tizen* <DX11 on DX9 GPU>

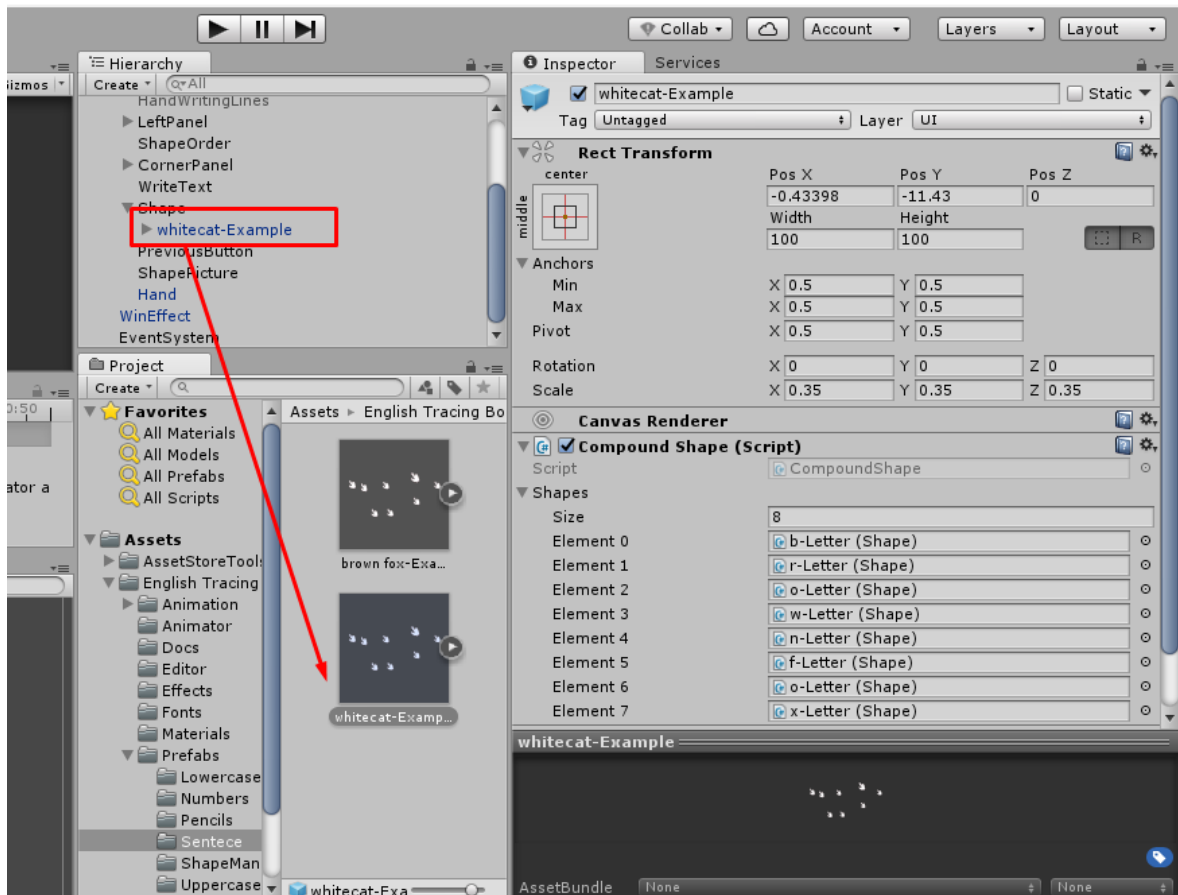

Edit Assets GameObject Component Asset Store Tools Window Help

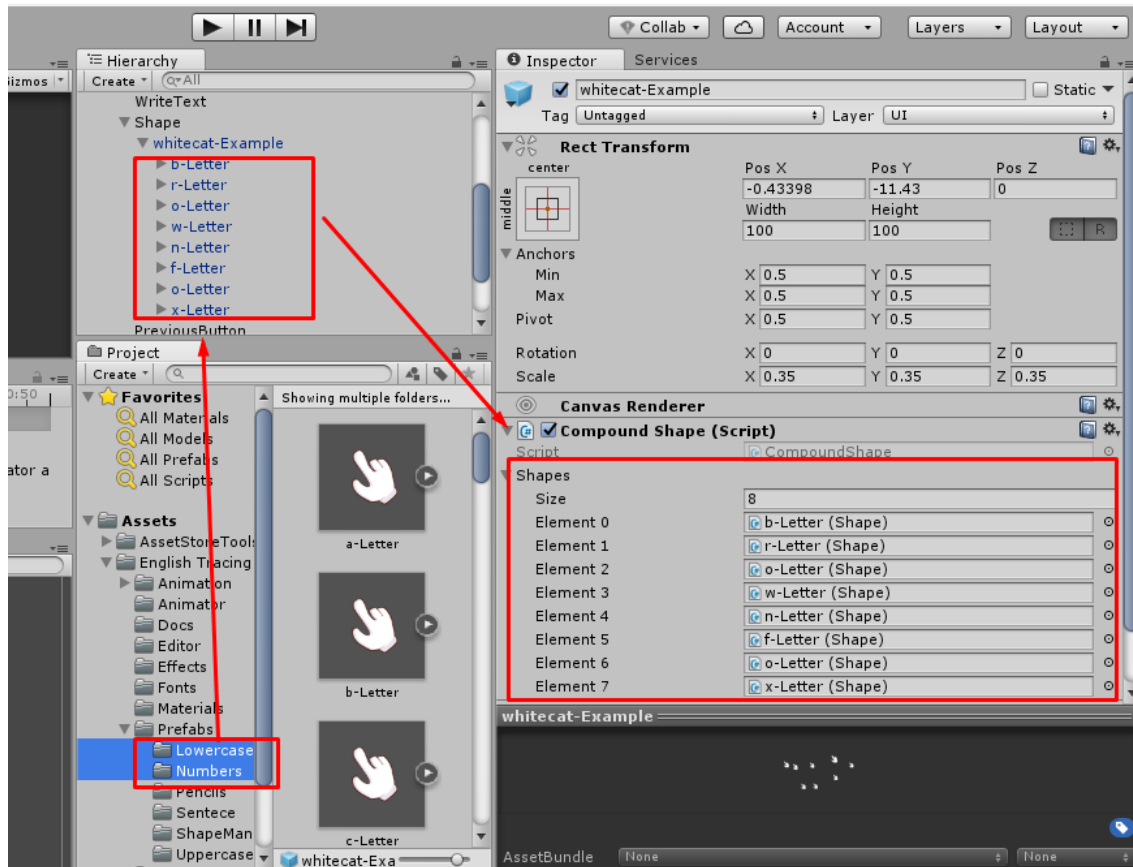

3. Rename the gameobject of the sentence , use Standard name like **newname-sentence**
forexmaple **whitecat-sentence** or **whitecat-example**, do not forget the dash - as a separator

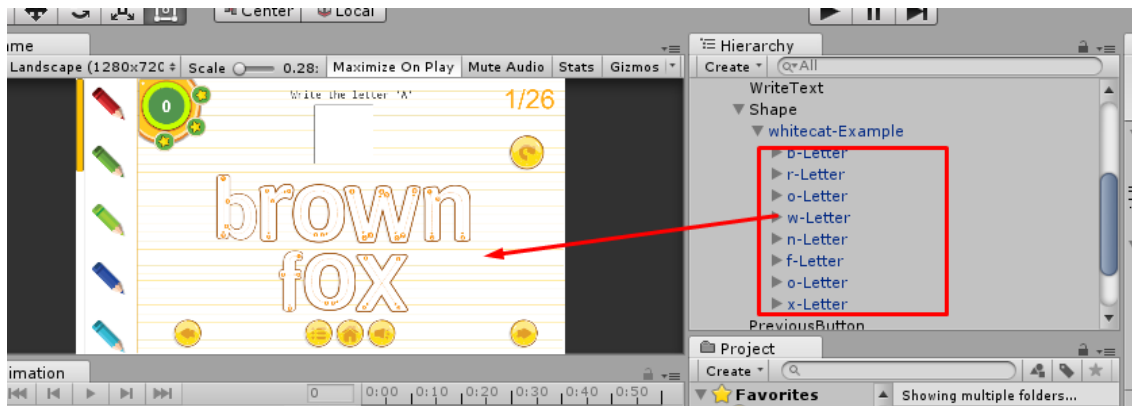

4. Convert the new sentence to prefab in the **prefabs** folder as the following figure

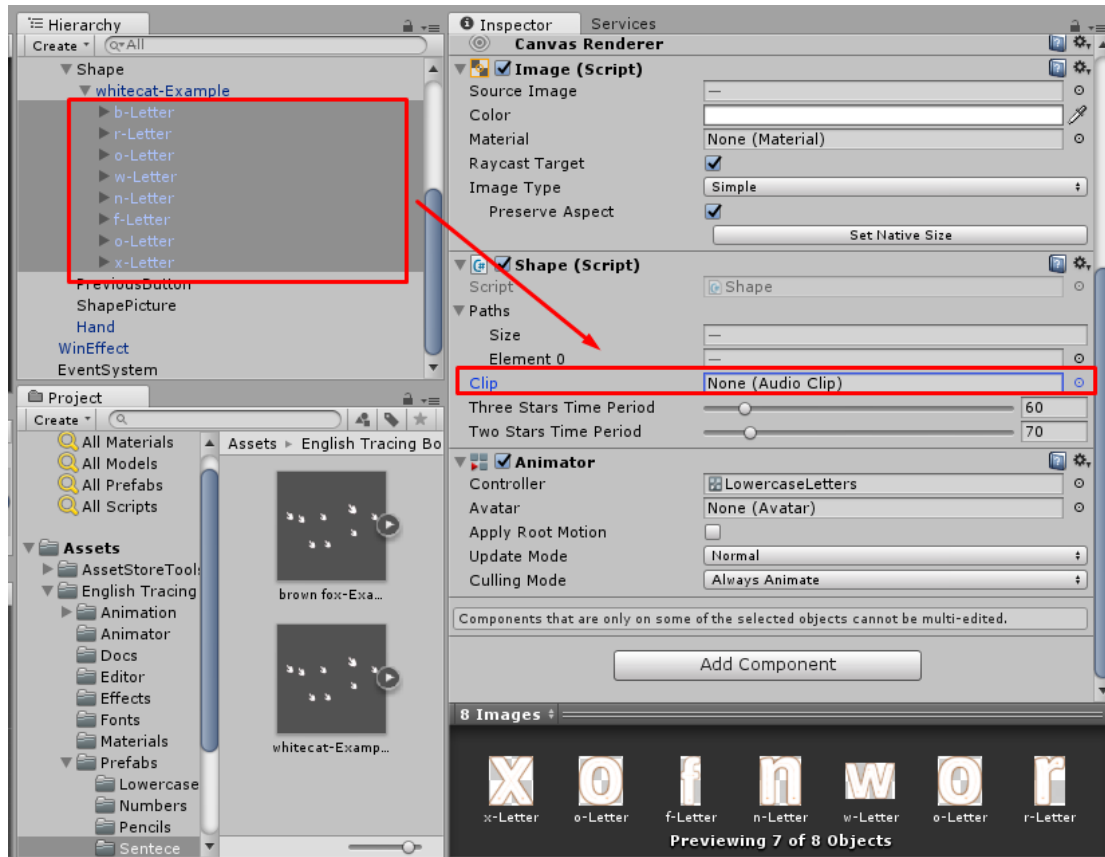

5. Now you can add any letter/number from **Lowercase**, **Numbers**, **Uppercase** folders to the sentence gameobject, and then add and sort them in the **CompoundShape** component to setup the tracing order of the letters in the sentence as the following figure

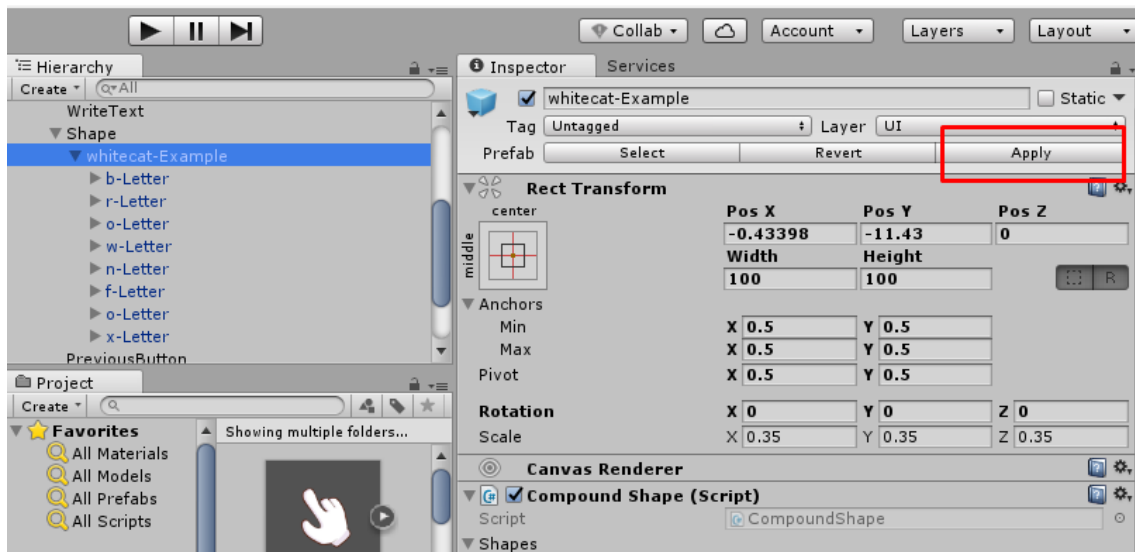

6. Scale/move the letters as you want in the game scene

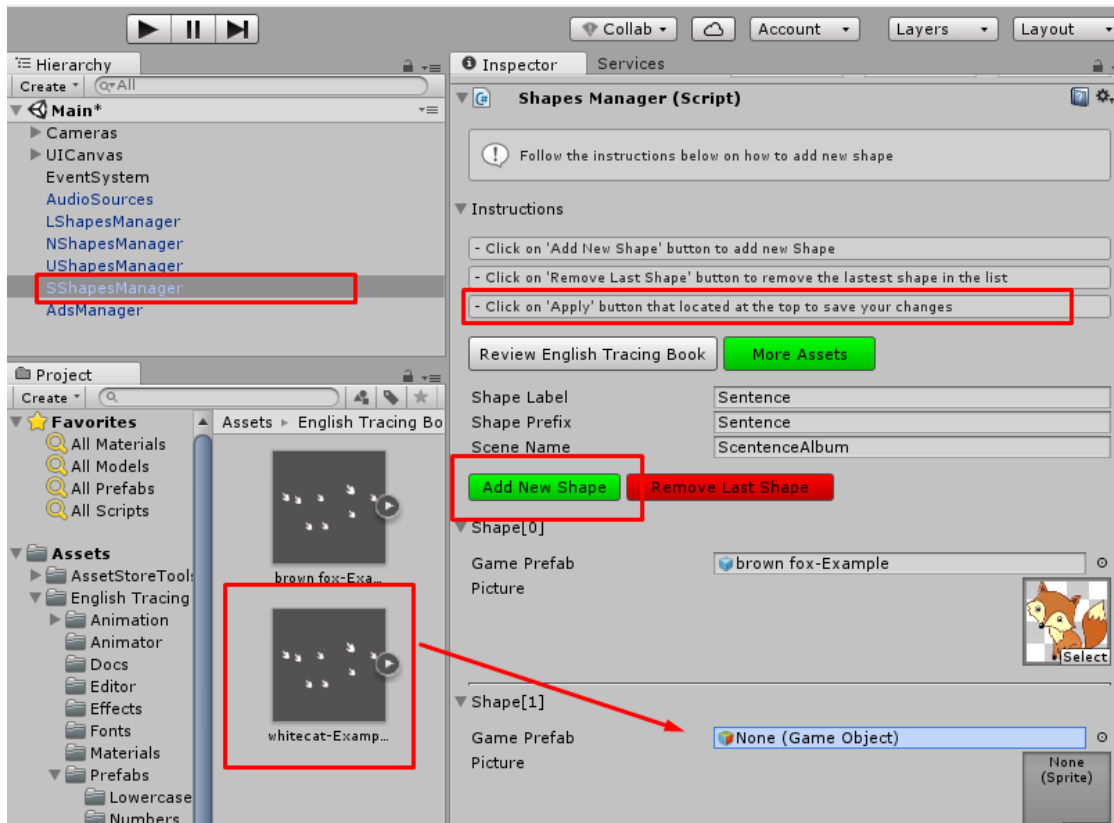

7. Add the audio clip of the sentence in the **Shape** component for each letter/number under the sentence game object as the following figure

8. Click on **Apply** button to save your changes, remove the **sentence gameobjects** from the Hierarchy in the Game scene and then save the scene

9. Final step, add the **new sentence** to the **SShapesManager** gameobject in the **Main** scene, then click on **Apply** button as described in the Instructions to save your changes
